

INFORMED CONSENT FOR TELETHERAPY

Prior to starting video-conferencing services, we discussed and agreed to the following:

- There are potential benefits and risks of video-conferencing (e.g. limits to patient confidentiality) that differ from in-person sessions.
- Confidentiality still applies for teletherapy services, and nobody will record the session without the permission from the others person(s).
- We agree to use the video-conferencing platform selected for our virtual sessions, and the therapist will explain how to use it.
- You need to use a webcam or smartphone during the session. (For video sessions.)
- It is important to be in a quiet, private space that is free of distractions (including cell phone or other devices) during the session.
- It is important to use a secure internet connection rather than public/free Wi-Fi.
- It is important to be on time. If you need to cancel or change your tele-appointment, you must notify the psychologist in advance by phone or email.
- We need a back-up plan (e.g., phone number where you can be reached) to restart the session or to reschedule it, in the event of technical problems.
- In the event of a crisis situation after business hours, call the Behavioral Access Nurse at the St. Cloud Hospital: (320) 251-2700. During business hours, staff will take emergency calls: (320) 257-1800.
- If you are not an adult, we need the permission of your parent or legal guardian (and their contact information) for you to participate in telepsychology sessions.
- You should confirm with your insurance company that the video sessions will be reimbursed; if they are not reimbursed, you are responsible for full payment.
- As your therapist, I may determine that due to certain circumstances, telepsychology is no longer appropriate and that we should resume our sessions in-person.
